JOB OPENING: TECHNICIAN POLYMER R&D

The position

As an Technician Polymer R&D you are responsible for the labscale synthesis of Innocore's SynBiosys® and InGell® biodegradable polymers. In addition, you are responsible for the development, optimization, and implementation of reproducible and well-scalable syntheses processes to continuously improve and expand Innocore's polymer platforms.

Your responsibilities include (but are not limited to) autonomously set up, plan, execute, and coordinate all steps in the synthesis of R&D and GLP grade polymers to support analytical method-, formulation-, process-, and polymer development work.

You report to the Functional Manager of the Polymer R&D Department.

The challenge

As a Technician Polymer R&D you:

- Plan and execute synthesis of R&D and GLP polymers according to the Work Instructions.
- Support Polymer R&D team with the development, optimization, and implementation of syntheses processes.
- Work together and effectively collaborate with Technicians, Engineers and Scientists of the different departments.
- Perform troubleshooting on equipment and processes and initiate corrective actions.
- Execute installation, qualification, calibration and/or maintenance activities.
- Identify, design and ensure compliance with company procedures and actively contribute to operational excellence initiatives.

Skills and competencies

In addition to having a BSc or MSc degree in (polymer) chemistry, you:

- Have a good knowledge of polymer synthesis.
- Having experience in a polymer production environment (R&D and GLP) is an advantage.
- Have strong research and analytical skills.
- Share information in an effective manner.
- Have a drive to get things done and bring a structured way of working.
- Look for opportunities to develop your skills and are eager to learn.

Offer

We offer a challenging and dynamic position in a modern and well equipped life science company where you will become part of a young and international team of co-workers. Remuneration will be according to standards in the pharmaceutical industry. At Innocore we are committed to offer the best possible environment for our employees, where people are challenged and supported to further develop

themselves. We provide a collaborative and creative environment where each member of the team feels encouraged to contribute to our processes, decisions, planning and culture.
